

- 1.0) The provisions of this bulletin are to be part of any engineering drawing, and/or production sequence. These provisions may or may not be called out specifically. However, if they are not specifically excepted, they will be presumed to apply.
- 2.0) Material certification shall be required from all vendors for materials used in Alnico castings, sintered Alnico and rare-earth magnets.
 - 2.1) Material certification shall be required from all vendors for cobalt and chrome bar stock and for barium ferrite magnets.
 - 2.2) Visual inspection shall be made of all incoming materials for possible contamination. Cobalt and chrome bar stock and magnets purchased for resale, will be inspected for size.
 - 2.3) A weight or physical count shall be made of each incoming shipment.
 - 2.4) Should non-conformance be detected, the provisions of SQC-110.00 shall apply.
